OFFERING

- 14 ANGUS YEARLINGS • 36 ANGUS FALL BULLS

Bulls semen tested and GE Epds
Price sheet and Catalog Available

RINKES CATTLE COMPANY PRIVATE TREATY BULL SALE OFFERING

Sales will be held at Rinkes Cattle Company located, from Holton, north 3 miles from the stoplight at the intersection of Hwy 75 and Hwy 16 to 254th Rd, go east 1 mile to Q-4 Road head north for 1/4 mile.

14 SPRING YEARLING BULLS • 36 FALL YEARLING BULLS

CALL FOR VIEWING APPOINTMENT • COME WHEN CONVENIENT
TAKE A LOOK • MAKE SELECTIONS • DELIVERY AVAILABLE

HEALTH

All cattle will be accompanied by proper health certificates for immediate shipment. The bulls sell guaranteed reproductively sound and will be semen tested. Bulls have tested negative for BVD-PI type 2.

Lot Numbers

Ear tags will correspond with the lot numbers in the catalog.

Terms

All cattle sell according to the terms and conditions of the American Angus Association.

PRIVATE TREATY

All cattle will be pre-priced, and price sheets will be available

Liability

All persons attending this sale do so at their own risk.

RECOMMENDED CALVING EASE SCORE

Recommended calving ease score for each bull is based off of information from bull's birth weight, birth EPD, calving ease direct (CED) score, and information from the pedigree. Bulls are scored as follows:

- ★★★ To be used on heifers
- ★★ To be used for heifers under supervision
- ★ To be used for cows

Caring for your Bull

All bulls sold will be accompanied by a proper reproductive examination and paperwork. Bulls have been checked by Dr. Don Sunday, DVM & Dr. Amy Sunday, DVM. However, please pay attention to your bull throughout your breeding season. Between semen check and turnout, things can happen that will inhibit your bull from proper breeding. If you see your bull breed a cow/heifer, record the number and make sure that animal is not in heat again in 18-21 days. If multiple animals are coming back into heat, there is a problem. Please call us so we can set up a plan to get your bull re-examined, and if need be, get a bull out to you on loan to get your cattle bred.

Bulls ADG & EPD's Explained

We believe in raising our bulls on a high roughage diet, consisting of sorghum or corn silage, brome silage, alfalfa and prairie hay. We use distiller grain as a supplemental protein to the alfalfa, and we work to use as little corn as possible when growing the bulls. All rations are balanced with a custom blend mineral.

Fall bulls are creep-fed while on the cow using Purina Accuration, of which they consume about 2lbs/head/day. Once weaned, usually the first week of June, these bulls are placed on a grow ration consisting of 70% forage to gain 3.25 lbs/day.

Spring bulls are weaned (first 2 weeks of September, depending on the weather) and placed on a similar grow ration with just a touch more energy and protein vs. the fall bulls. The ration consists of the same feedstuffs, with 65% of the ration being forage, aiming for a gain of 3.5 lbs/day. Once the bulls are lined out from weaning, the "On Feed Test" begins in the middle of October and runs to February 1. This is where the ADG numbers comes from on the Spring Yearling Bulls.

Expected Progeny Difference (EPD) is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Calving Ease Direct (CED) is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW) is expressed in pounds and is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW) is expressed in pounds and is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW) expressed in pounds is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk) is a predictor of a sire's genetic merit for milk and mother ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mother ability.

Vaccination Program / Herd Health

We have received inquiries concerning the maintenance of the health of our cattle. Our vaccination program was developed by working with our local veterinarians to tailor a program that met the needs of our herd. The program does change from time to time, depending on the needs of the cattle and any problems that may arise. Please feel free to use our program as a guide, and consult with your vet to develop/change your program.

Mineral Program

Cattle have access to mineral and flaxlic tubs year round. The mineral is a custom blend that is specifically balanced for breeding and fly control. Cattle are sprayed with insecticide as needed during the summer grazing season. Since we went to use fly control in our mineral, we usually only have to spray once per grazing season, if at all.

Reference Sires

Sitz Stellar

Reg: AAA *18397542 DOB 1/23/2016

- 2017 Sitz Angus Sale Topper
- Big time calving ease and performance
- Outstanding maternal pedigree and design
- Super thick topped and deep sided bull that only improved his power house phenotype while breeding cows as a yearling

Musgrave 316 Exclusive

Reg: AAA *18130471 DOB 2/6/2015

- Exclusive has great capacity, excellent mobility behind, great muscle expression and doing ability.
- Exclusive is high growth bull with above breed average Calving Ease, and is Capitalist's highest carcass merit son.
- Early calf birth weights at Musgrave would suggest his Birth EPD's should come back.
